1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

92808	**LF702** BIGA

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 9. Propylene Glycol Formulation. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

Upgrade:	**LF3554**

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

D. CROSS REFERENCE BY PART NUMBER

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.

1. For a Fleetguard Long-Life Magnum element, refer to the standard element in the Principal Application section. 2. For Cummins KV-16 applications, use LF3325; for Detroit Diesel applications, use LF3333; for all other applications, use LF670. 5. Refer to Principal Application section to determine performance level. 6. Refer to Principal Application section for Synthetic Media version. 7. Complete kit must be installed before replacement element can be used (for most applications). Refer to 'Superfilter' specifications in the Service Parts section for exact usage. 14. This cross is a beta 200 media part number, and is an upgrade for the beta 75 number. 15. Does not meet OE specifications. 16. Parts are similar to one another, however they are not an exact cross.
